### DETAILED ACTION

**Note:** Claims 24, 32, and 40 which Applicant has called “withdrawn” are considered cancelled because Examiner considers the intent of Applicant to cancel these claims.

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 25, lines 2 and 3, the limitation “shape of the plate is different with a plant pot” is unclear because the plate does not change shape when a pot is placed in it. Perhaps the language should be --the shape of the plate is different from a plant pot--.

In Claim 29, line 1, the dependency “of claims 1, and 27,” is indefinite because multiple dependent claims must be stated in the alternative (for example, --The tray of claims 1 or 27,--). see MPEP 608.01(n). **Note:** Examiner considers Claim 29 to depend upon Claim 1.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3643

Claims 1 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by JP6-225651.

As to Claim 1, JP6-225651 discloses a tray (Figs. 1,2 and 7) for a pot comprising a plate (8 of Fig. 7) with side walls and a bottom wall (7 of Fig. 1), the plate holding fluid (Fig. 1); a wick (Fig. 2) accompanying the plate which provides fluid ( Fig. 1); and, at least one support (7 of Fig. 7) coupled to the plate for supporting a plant pot, the at least one support makes enough space for reserving fluid in the tray (see Fig. 1).

As to Claim 29, JP6-225651 further discloses a lip (region of plate around leadline of element 8).

Claims 25, 28, and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmohl (DT 2539552 A1).

As to Claim 25, Schmohl disclose a self watering apparatus (see Figure in abstract) comprising a plate (1 of Figure) with side walls and a bottom wall, the shape different from a plant pot (see Figure), sidewalls (region around leadline of 1 in Fig.) supporting the pot with a clearance between the walls of the plate and the walls of the pot; and a wick (3 of Fig) with a tube (2 of Figure) accompanying the plate which provides a fluid conduit capable of sucking fluid from the plate.

As to Claim 28, Gardner et al. further disclose a notch (7 of Fig) for holding a pot and air flowing in and out of the tray.

As to Claim 46, Gardner et al. further disclose a rod (7 of Fig) for holding a pot.

Claims 27, 44, and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by JP7-147851.

Art Unit: 3643

As to Claim 27, JP7-147851 discloses a self watering tray (2 of Fig. 1) for a plant pot comprising a plate (1 of Fig. 1 with side walls, bottom, and fluid (10 of Fig. 1); at least one leg (6 of Fig. 1) coupled to the plate with two section, an up section (defined as up section by Examiner in Fig. 1) and a low section (defined as low section by Examiner in Fig. 1) the up section smaller than the low section (defined as smaller in diameter), and a shoulder (defined as shoulder by Examiner in Fig. 1) between the up and low sections.

As to Claim 44, JP7-147851 further discloses a sucking material (9 of Fig. 2).

As to Claim 45, JP7-147851 further discloses a wick attached to the up section (9 of Fig. 2).

### ***Response to Arguments***

Applicant's arguments with respect to Claims 1,25,27-29, and 44-46 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP7-313003 and JP5-219845 disclose in the prior art various trays with wicks.
